

49 NORTH

Sprayer Antifreeze -35°

49 North Sprayer Antifreeze is a blend of methanol, water, and a cold weather additive package. This product is an economical means of preventing freeze-thaw damage to agricultural sprayer lines, reservoirs, and sprayer tips. This product is carefully blended to ensure maximum freeze protection. Use at full strength, do not dilute.

Recommended For:

- › Agricultural Sprayers
- › Directional Drilling Equipment
- › Water based systems requiring winter storage

Features and Benefits:

- › Wide temperature application protects against winter freeze up.
- › Anti-foam properties minimize foaming potential.
- › Economical antifreeze solution.
